Subject: Conditional No Exposure Certificate Granted

RE: Longview Fibre Paper and Packaging
5901 E Marginal Way S
Seattle WA 98134

Dear P. Larry Brill

Your activity is eligible for a Conditional No Exposure Certificate and your application has been granted. This decision was based on an Ecology inspector's determination that you meet the requirements for conditional no exposure.

You must submit a Notice of Termination form to Ecology to terminate your current coverage under the Industrial Stormwater General Permit, permit number SO3000206. That form is enclosed. On the form, please indicate that the reason for termination is that you have been granted a Conditional No Exposure Certificate.

If conditions change at your facility and pollutants from activities at your facility become exposed to stormwater, you are required to inform Ecology immediately and apply for coverage under the Industrial Stormwater General Permit. Ecology may also conduct a site visit in the future to verify that stormwater is not exposed to pollutants at your site.

You are required to reapply for the Conditional No Exposure Certificate every five years or within 30 days of Ecology's reissuance of the Industrial Stormwater General Permit, whichever is sooner.

If you have questions about this decision, please contact Josh Klimek at (360) 407-7451.

Sincerely,

Nancy L. Winters, Section Manager
Program Development Services Section
Water Quality Program

What is an eDMR?

An eDMR is a new approach to submitting your DMRs to Ecology. Unlike the current paper method, this new system is fast, available practically all the time over the Internet, and can be customized for your needs. There is no longer a need to find stamps and rush to the post office before it closes to mail your DMR.

Instead you can log onto the Internet, select your facility information, select the begin date, enter your values, then submit the data. If you are required to keep daily values, the new eDMR system will help you as well. We'll even store your data for you after you submit the DMR (up to a year after it is submitted) just in case you need to redo or reprint it

How much does it cost?

There are no fees for registering and using the eDMR system.

Must all DMR submittals be eDMR?

The eDMR is strictly voluntary. You may submit a paper DMR if you find out that the eDMR system doesn't meet your needs.

What if I'm responsible for more than one facility? Do I need an eDMR account for each?

You can register more than one facility under one account. All we ask is that when you register, you provide proof that you are responsible for each of your listed facilities.

What sort of proof?

Proof comes in the form of a copy of one of the following:

- A previously submitted DMR -or-
- A permit's cover sheet -or-
- A permit's letter of coverage -or-
- Mail from Ecology that includes both the facility's name and the permit ID.

I'm interested but don't want to commit. Is there a demo page that I can try out first?

Sure. Go to

<http://apps.ecy.wa.gov/edmr> and click on

"Click here for a Hands-On demo of the eDMR system (no data will be saved)".

What do I get out of this?

Some of the benefits of the system are:

- Availability 23 hours a day (the system is unavailable from 1:00AM – 2:00AM for daily maintenance).
- Enter both daily and summarized data together.
- No time delay for submitting.
- A person can fill in the data at one place then inform their supervisor in another place to view and submit the DMR.
- DMR requirements are customized for each facility and DMR type.
- Submitted eDMRs are given a tracking number so Ecology can inform you when they are received.
- Submitted eDMRs can be accessed online (for up to a year) for re-printing or re-submittals.
- The system helps track by whom and when a DMR was submitted to avoid duplicating work.

What do I need to use the eDMR system?

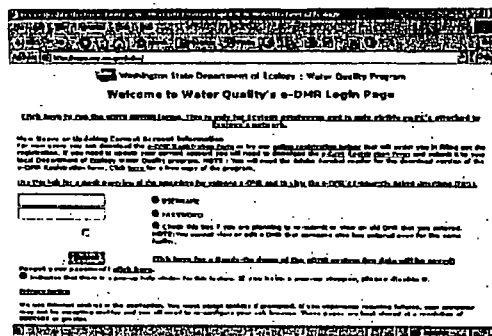

The eDMR system requires a few common computer components:

- A PC or Mac
- An Internet connection
- A web browser (Internet Explorer or Netscape version 6.0 or higher)
- A personal e-mail account
- A printer to print the completed DMR or registration form.

So how do I get started?

First you must register and create an account with Ecology to safeguard yourself and your data from potential hackers. You can download a copy of the registration form and fill it out by hand or use our online registration wizard to help fill it out. After you turn in your signed registration form, we verify your account and send you your account information. If all the data look acceptable, your account will be available the next business day. If you notice an error in your information, inform us and we'll fix it so you can be up and running with minimal delays.

Ready to register?

Try the eDMR online Registration Wizard to help you fill out the registration form at <http://apps.ecy.wa.gov/edmr>.

OR

Go to <http://apps.ecy.wa.gov/edmr> and download the registration form. NOTE: The form requires Adobe Acrobat Reader. If you do not have this software, you may click on the web link on the page to download your free reader program.

OR

Call your local Department of Ecology, Water Quality Program office for a copy of the registration form.
